## ABOUT

I am a passionate snooker coach with over two years of experience in volunteer coaching beginners in Hong Kong and in the UK. My coaching philosophy emphasises STEM-based learning by incorporating elements of physics, geometry, mathematics, and biomechanics to help students understand the science behind snooker. I am committed to helping students learn from the basics, enhance their skills, gain confidence, and foster a lasting interest in the game.

## ABOUT

I am a WPBSA 1st4sport level 2 snooker coach with over 25 years playing experience at both snooker and billiards, with basic knowledge of pool as the rules keep changing but the fundamentals to all cue sports still the same.

With a high break of a 136 in competitive match, I feel I'm still capable of helping others around the baize. Back in 2019, I was asked to help out a junior academy and do my coaching badges, and after recovering from throat cancer, it all started there with the only motivation to give something back and help others.

Many players from that very academy have now gone on to be century standard players playing at high levels representing their country, playing in national finals, participation in Q school, as well as successful runs in European and international events, and a few players joining the WDBS as well.

I am a passionate coach whose aim is to help players of all ages and levels develop their skills and playing abilities. Being an accredited qualified S.Q. Coach is something I am very proud of, it allowed me to work alongside a true coaching legend, the late Terry Griffiths, as well as his son Wayne, and a number of fantastic legends and coaches.
